9,000 PVC doors per
month

Production capacity:
35,000 PVC windows
per month

ABOUT THE COMPANY

Our company is located 5 km from the city of Chernivtsi, in the village of Velikiy Kuchuriv. The factory area occupies more than 16,000 m², more than 500 workers work in production. The company "Windows Style" has been successfully selling and manufacturing in the market since 2003. It is a success story based on the desire to be better and not to compromise when it comes to quality.

Own logistics and free product delivery represent a practical and comfortable solution for our partners. Also, our company uses unique software that allows you to control all stages of production and shipment of products.

The sales geography covers the entire west of Ukraine, and we also have successful experience working with partners from Romania, Germany, Italy, Portugal, Canada and the USA.

Thousands of satisfied customers around the world trust the company

SEAMLESS WELDING OF CORNERS

Seamless welding of the corners in PVC windows and doors ensures high stability, improved tightness and durability. Thanks to the invisible seams, the windows look aesthetically pleasing and have better thermal and sound insulation. This technology also makes the windows easier to maintain, as there is no dirt build-up in the joints. This is a modern solution for high-quality, durable and reliable windows.
